HyperVu is a powerful tool for publishing CorVu performance management information through interactive HTML pages. It provides fast and easy access to reports, graphs, executive dashboards, and scorecards via a web browser. An integrated component of CorBusiness, HyperVu is a low-cost and scalable solution for timely, large-scale information deployment.

With HyperVu, standard monthly reports can be pre-published to make them accessible to anyone with a web browser. And, personalized performance data can be delivered on-demand in pure HTML or PDF.

### IMPROVE OPERATIONAL EFFICIENCY

Easily deploy reports, dashboards, and scorecards to any number of users on an intranet or the Internet. Web browser access eliminates the need for additional client software and cumbersome downloads, meaning zero footprint on PC's.

### IMPROVE TIMELINESS OF INFORMATION

Web deployment, report scheduling, and on-demand report generation ensure up-to-date information.

### IMPROVE REPORT QUALITY

Easy access to text, tables, graphics, and hyperlinks. Static HTML pages allow high performance. Embedded hyperlinks enable intelligent and interactive capabilities, including slice-and-dice and drill down.

### EXPAND USER BASE

Easily extend information access to tens of thousands of users. Provide report, dashboard, and scorecard access to operational and strategic users, suppliers, partners, and customers.

## HYPERVU

### THE EXECUTIVE OVERVIEW

# THE CORVU 5 SOLUTION

## WHAT SETS HYPERVU APART:

### FAST

- ▶ Deploying static HTML pages instead of large amounts of data allows a high performance user experience

### INTELLIGENT AND INTERACTIVE

- ▶ Embedded hyperlinks enable intelligent and interactive capabilities, including slice-and-dice and drill down

### SCALABLE

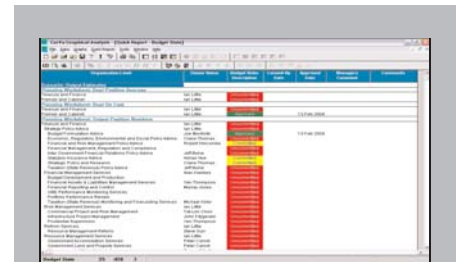

- ▶ Unrivaled scalability that can be deployed in any environment, from small organizations to tens of thousands of users

### EASE OF DEPLOYMENT AND ADMINISTRATION

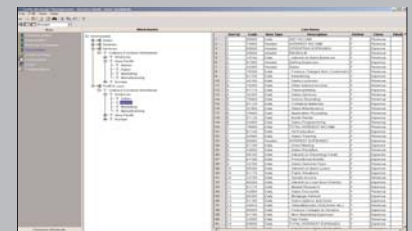

- ▶ Web browser access, no additional client software, and no software downloads streamline the deployment and maintenance process

### UP-TO-DATE INFORMATION

- ▶ Balance between scheduled and on-demand report generation ensures timeliness while still maintaining optimal performance

Quick Report

Drill down from one graph to another

Report with embedded graph in group footer

## KEY FEATURES:

### ▶ INTERACTIVE HTML

- Publish static HTML web pages as intelligent and interactive web objects
- Embed text, tables, graphics, and hyperlinks into static web pages
- Embed hyperlinks in a column of a Quick Report
- Add hyperlinks to page headers/footers and group headers/footers
- Extend report features by embedding markup language
- Provide hyperlinks for drill down giving slice-and-dice capability
- Pre-publish HTML reports via the CorBusiness Scheduler
- No training required for end users

### ▶ HTML ON-DEMAND

- Provide a static HTML view of any CorBusiness object (reports, graphs, tables, dashboard)
- Generate reports on demand
- HTML generated on-the-fly; no pre-building of HTML pages needed
- Immediate ability to change values for prompted constraints
- Reference style sheets to apply corporate style settings to all published reports
- Publish reports in HTML or PDF
