Net.Data Training Workshop

“Looking for a cost-effective way to web-enable your legacy and green screen applications?”

Are users demanding more window-styled, web-enabled screens that are easy to navigate? Would it make life easier if remote users i.e. your sales force, could access real-time critical data 24x7, anywhere, anytime? What about if it was cost-effective and leveraged your current iSeries/400 investments?

GEMKO Information Group has the answer: ***“Net.Data Web-Enablement Training Workshop”***.

For a quick peek of the results you would soon be able to deliver, visit <http://www.gemko.com>, click the e-business Supply Chain Connection (SCC) “3 link chain” in the bottom right hand corner. Use ID: 100, Password: GEMKO (in caps).

Begin leveraging your iSeries/400 investment by taking advantage of this educational browser-based application development workshop. For more information contact:

Browser-Based Application Development *(A two-day, hands-on training workshop)*

Class Overview:

Learn to use the iSeries Web Server and the Net.Data development language in conjunction with HTML & SQL to create browser-based applications that integrate real-time with the UDB2/400 database. Deploy these applications internally on your local area network (LAN) or externally via the Internet.

Target Audience:

This workshop is targeted towards programmers and web developers within an iSeries/400 environment.

What You Are Taught:

- How to setup and configure the iSeries/400 HTTP server included in OS/400.
- Understand how HTML and Net.Data work together to develop a browser based application.
- Introduction to HTML syntax code and common HTML programming functions.
- Describe the sections (components) of Net.Data and their role in developing programs.
- Describe Net.Data's built-in functions and how to use them to develop programs.
- Understand how Net.Data integrates with UDB2/400 via SQL.
- Understand how to integrate Net.Data with other programs, such as RPG and CL.
- Create Net.Data programs that access UDB2/400 data; served by the iSeries HTTP server; accessed via a browser.
- Understand available technical resources and where to find more information about Net.Data.

Net.Data Training Workshop

Student Feedback:

Corinne Kroenig, Systems Analyst
BCB International, Inc.

"Net.Data enabled us to present open order information...products purchased, quantities, frequency... In a user friendly web-based client. Customers can now retrieve real-time order status data 24x7, anywhere, any-time. This technology reduced Customer Service levels providing us with the competitive edge to serve our clients more efficiently".

Marsha Brosius, System Operator
Niagara Cutter, Inc.

"The class books and materials are easy to follow and are well documented for future use. When I returned to the office and began implementing what I learned...the set up was exactly as I learned in class and the process was identical to the class materials"
